The Clinton China service plate was created to commemorate the 200th anniversary of the first occupancy of the White House by John Adams in 1800.

*Did you know ??*

The **White House china** refers to the various patterns of china (porcelain) used for serving and eating food in the White House, home of the president of the United States. Different china services have been ordered and used by different presidential administrations. The White House collection of china is housed in the White House China Room. Not every administration created its own service, but portions of all china services created for the White House are now in the China Room collection. Some of the older china services are used for small private dinners in the President's Dining Room on the Second Floor. **Wikipedia**
