DR. DISINFECTANT™

A “No-Rinse” Disinfectant-Cleaner

Especially developed for use in Hospitals!!

(Concentrated Broad Spectrum Iodophor)

Based upon proven “tamed-iodine” technology, **Dr. Disinfectant™** was especially developed for use in hospitals and out-performs in food handling plants and other facilities that need to control the spread of infectious diseases.

The **Dr. Disinfectant™** formula contains a mixture of nonionic wetting agents complexed with elemental iodine that provides bactericidal activity – the formula is not affected by water hardness up to 400 ppm CaCO₃; and works well at low temperatures and meets Blood Borne Pathogens cleanup requirements.

Dr. Disinfectant™ sanitizes previously cleaned food contact non-porous surfaces such as glass, metal, plastic, and porcelain as well as glasses, dishware, pots & pans, and utensils in food service operations – and is an excellent product for HAND SANITIZING!

OUR PROMISE TO YOU: Meets OSHA Blood Borne Pathogens requirement • Broad Spectrum Iodophor • Tuberculocide • Virucide • Bactericide • Fungicide • Deodorizer • Built-in Color Indicator • Disinfects & Cleans in 1-Step • No-Rinse Sanitizer • Multi-Purpose
