

In God we trust

Mr. Maintenance™

Fuel System Treatment

Cleans Tank "Like New"!!™

SAFE FOR ALL:

Gas, Petrol, Ethanol, Propane, & Natural Gas Fuel Systems
Synthetic Blend - **NON-HAZMAT**

Our **Mr. Maintenance™** Fuel System Treatment is formulated to out-perform any like product in the industry. He meets the highest engine industry standards for intake valve and combustion chamber cleanliness & he benefits new as well as older vehicles.

Mr. Maintenance™ is one of the very few double-acting super concentrates on the market today. Our state-of-the-art synthetic formula cleans injectors, carburetors, and combustion chambers in only one tank treatment. **Mr. Maintenance™** contains friction fighters that travel from the fuel into the motor oil. The friction fighters work with the motor oil in the critical area on top of the pistons where only splash lubrication is present. One can expect mileage improvement even on new cars and more noticeably on older cars. **Mr. Maintenance™** improves poor quality of fuels and offers maximum efficiency.

OUR PROMISE TO YOU:

Cleans tanks "Like New"!!™ - Reduces Emissions 18 – 20% - Keeps Fuel Lines from Freezing – Reduces Friction - Improves Mileage & Performance - Eliminates Pinging & Knocking - Restores Power & Acceleration - Will not void mfg. warranty - Improves Lower Quality Fuels – Biodegradable - Decreases Octane Requirement!! - No need to purchase Octane boosters!! - Cleans, Protects, Lubricates Fuel Injectors, Carburetors, Valves, & Combustion Chambers - Disburses Water & Protects Injectors from Water Damage - ONE TREATMENT: Provides full PFI & full Intake Valve Deposits Clean Up.

Has your vehicle failed an emissions test lately?? If so, add Mr. Maintenance™ to your fuel tank then take the test again to see a reduced emissions between 18 – 20%!!

DIRECTIONS: 12 oz. / 355 ml treats 18-20 gallons / 68-76 liters of fuel. When fuel gage is at ¼ full, pour entire contents into the fuel tank then fill tank with fuel to blend. DO NOT REFUEL until fuel indicator is back to ¼ full – this allows Mr. Maintenance™ to work on one full tank of fuel. After Mr. Maintenance™ cleans the system, the fuel filter may need to be changed. Add Mr. Maintenance™ every 3,000 miles or so.
