Non-aerosol Pump Spray

SUPER™

SPRAY-LUBE

Exceeds MIL-SPEC

Lubricates / Prevents Rust / De-moisturizes

SUPER™ SPRAY-LUBE exceeds lubrication parameters of all other spray lubricants as it maintains its fine qualities in high corrosion and extreme humidity environments. *Flowing deeply into hard-to-reach areas*, this product provides quick, positive, long-lasting lubrication for automotive & industrial applications – as well as for around the house. **SUPER™ SPRAY-LUBE** is excellent protection against rust and corrosion, while penetrating seized and corroded mechanisms.

As a Penetrating Oil - Penetrates effectively on even the most severe cases of rusted equipment, parts, and components, dispersing into corroded areas to loosen scale and free up working mechanisms. **As a De-moisturant** - Provides thorough moisture displacement in damp or soaked electrical or electronic systems. A migrating film burrows under condensation and moisture, driving it to the surface where it dries or can be wiped off to reactivate circuits. **As a Lubricant** - offers long-lasting lubrication for a wide variety of applications, flowing and lubricating deeply into hard-to-reach internal areas and contains our advanced technology, anti-friction Engine Treatment for reduced wear and friction and increased performance of moving metal parts.

Our formulation contains the best rust and oxidation preventatives to **stop rust dead in its tracks!!** **SUPER™ SPRAY-LUBE** will also remove corrosion and corrosion bridges from printed circuit boards after a light spray and “toothbrush” scrubbing. A microfilm layer remains on the surface after excess is wiped away, protecting against future corrosion.

OUR PROMISE TO YOU: “Creeps” into hard-to-reach areas / Loosens seized & corroded metal mechanisms / Loosens scale & frees up working mechanisms / Provides quick & thorough moisture displacement / Provides long-lasting protection against Rust & Corrosion / Provides free-flowing protection / Does not affect painted surfaces / Does not contain carbon tetrachloride / Will not harm insulation

RECOMMENDED FOR: Wet / Damp Ignitions, Electrical Circuits, Motors, Controls, Starters, Electronic Equipment, Distributor & Plug Wires, Metal Mechanisms, Gears, Locks, Hinges, Metal-to-Metal Moving or Sliding Surfaces, Levers, Linkages, Rusty Parts, Products in Storage to Prevent Rust, Industrial Equipment, Tools, Sleeve Bearings, Open Gears, Chain drives, Steel Cables, Drag Lines & Bushings, Couplings, Pulleys, Linkages, Hinges, Wheels, Tools, Rusty Nuts & Bolts, Augers, & any Automotive, Industrial, or Commercial areas of lubrication that require an external spray lubricant.

Ultimate Maintenance – Friendly to the Environment
